

Dear GA Delegates, Dear Friends,

It is with so much excitement I am writing this motivation letter for FCAC member of FYEG.

Although my relationship with finances is not backed with educational background in financial matters, I do get along with spreadsheets and organisational finances very well: Throughout my years firstly in Cooperation and Development Network Eastern Europe - FYEG's sister organisation - as a Network Coordinator, and now in a Green fundraising foundation as a project coordinator -- where I deal with financial monitoring and auditing as well -- I have learned that organisational finances are a mirror of organisation's political values, aspirations and orientation; spreadsheets are an endless field for putting green principles in practice.

For FYEG, as a superdynamic organisation with increasing ambitions and capacities, this field can be full of different options. Having gotten acquainted myself with the current FCC's report, it is only going to be my pleasure to monitor together with other FCAC members the implementation of this year's practical recommendations and analysing what steps are being made towards the long-term sustainability vision. In addition, I believe my external insights and commitment to green principles will support responding to emerging potential challenges during the next couple of years.

I would be honoured to be given the chance to support the Secretariat's and treasurer's work in the organisation's continuous process of championing the financial management. And financial routines aside, who would deny that working with young greens and this amazing organisation is genuinely fun, motivating, and empowering?!

Yours,

Sopho Mchedlishvili
