The Reason for Joining FYEG

Young Greens of Georgia (or formerly Georgian Young Greens) have always been a very active member organisation of FYEG as well as having an active role in the local political/activist landscape. The aim of Georgian Young Greens was to establish and strengthen a truly progressive green political party in Georgia whose politics is largely dominated by neoliberal and conservative policies. In 2020 the organisation has finally decided to take a big step in this road and transform it into a movement/proto-party (Mtsvaneebi) which will openly work on establishing a green party in a short period of time. Though the Mtsvaneebi is still largely dominated by youth both in the Political Committee and in the central office, it is not a youth organisation anymore as everyone who aligns with the political stances can join. Therefore, there is a need for an independent, autonomous youth wing which will have a say in the newly established political party.

On that account, we wish to continue to be part of the European Young Greens family, be active, participate in activities, debates and discussions; on the one-hand learn from other member organisations and on the other hand share the experience and knowledge we have.
